

## 11ac 1200 Mbps Ceiling / Wall Mount Wireless Access Point

W5-C1200 is an 11ac Wi-Fi standard, Dual Band, High Power Ceiling / Wall Mount Wireless Access Point with MTK chipset supports WAVE 2 MU-MIMO, combined with 1200 Mbps Wi-Fi speed over 2.4GHz (300 Mbps) and 5GHz (900 Mbps), supporting more than 80 client devices for high density deployments. This mode is suitable for deployment options for hotel, school, restaurant, SMB or other enterprise place.

### FIT / FAT OPERATION MODE

W5-C1200 support FIT and FAT operation modes in FIT Mode the AP work with the WLAN Controller, supports plug and play deployment, centrally monitored and management by the WLAN Controller, mostly for enterprise applications. In FAT Mode the AP work in the standalone configuration and support operational modes as Access Point, Repeater, Gateway, WISP. The AP can be configured by GUI. This mode is suitable for home use or very few AP deployment scenarios.

### MULTIPLE PROTECTION FOR STABLE PERFORMANCE

W5-C1200 AP casing is made with ABS fireproof material. The AP PCB board is with watchdog design, can reboot automatically in case of failure. The AP also supports lightning and ESD protection & can install in various harsh environment.

### POWER OVER ETHERNET

W5-C1200 has integrated IEEE 802.3af Power over Ethernet (PoE). Transporting both power and data across a single ethernet cable ease the installation and lower the cost. This can be installed in areas where power outlets are not readily available, eliminating the mess of altering existing network infrastructure.

### ZERO CONFIGURE & CLOUD MANAGEMENT SYSTEM

Support FIT / FAT AP together, work with WLAN Controller, zero configure in IP address, ESSID, Channel, Password, upgrade firmware, backup and restore. Then the WLAN controller can access into Cloud Management System, easy to make administrator access it, to do remote monitoring / management at any time and any place, make this AP and WLAN controller more professional and cost saved in Wi-Fi Projects.
